BTONE'S WATER FILTERS—These filters have been highly approved of in Europe and America for the last thirty years, and are accounted superior to any hitherto invented, as they combine the properties of purifying as well as clarifying the most turbid water. It is almost needless to advert to the utility and advantages to be derived from the use of a well constructed filtering apparans, as it is obvious to every person that filtered rain water is much more wandesome and conductive to health than either spring or river water, the former almost invariably containing mineral substances in solution, and the latter being impregnated with decayed and putrid animal and vegetable matter, the constant use of which frequently occasions the most dreadful diseases, such as fevers, agues, here complaints, &c. Filtered water is also of the greatest importance for extracting more perfectly the virtues of tes, coffee, &c., the truth of which can be easily tested by making the experiment with filtered and unfiltered water. Manufactured and sold only by J. STONE, Plumber and Engineer,

P. S.—Those who have Filters made by persons not understanding the business, can have them repaired, and fitted up on the subscriber's plan, and warranted to act perfectly. Jy22-Im\*
